

Ayurveda Wellness – Health & Wellbeing Checklist

To be completed ahead of your retreat, alongside your pre-retreat questionnaire.

Physical Health

- ☐ Please disclose any injuries, surgeries, chronic conditions, or physical limitations at your discretion.
- ☐ Our Pilates Director has specialist training in injury-aware movement, and all sessions include modifications where needed.
- ☐ If you have a significant medical condition, please consult your doctor before attending.

Mental Health & Wellbeing

- ☐ Ayurveda welcomes participants at many stages of their personal journey, including those working with a therapist, coach, psychologist, or psychiatrist.
- ☐ If you are currently taking psychiatric medication or navigating an acute mental health episode, please speak with your treating practitioner before registering and have an honest conversation with our team.
- ☐ Coaching sessions are transformative and emotionally engaged – understanding your context allows us to support you appropriately, rather than push you beyond what is right for you.

Dietary Needs

- ☐ Our menu is built around whole, nutrient-dense ingredients: cold-pressed juices, plant-forward lunches, and dinners designed to support recovery.
- ☐ We cater for vegetarian, vegan, gluten-free, and dairy-free needs – please share any allergies, intolerances, or preferences when you complete your questionnaire.
- ☐ For complex medical dietary requirements, please contact us directly before booking so we can confirm full accommodation.

Travel Insurance

We recommend arranging comprehensive travel insurance covering medical treatment and evacuation for your trip to Bali, and sharing your policy details with our team for emergency reference.

A Note on Priority

None of the above disqualifies you from joining. It simply allows your Pillar Directors to hold the right kind of space for you. Your wellbeing, not your performance, is always our priority.
